## Damien Rouhling

Post-doctoral fellow

51 rue du maréchal Foch 67540 Ostwald France ⊠ damien.rouhling@ens-lyon.org

|                                    | Professional situation                                                                                                                                                                                                                           |
|------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| October 2019 –<br>Present          | Post-doctoral fellow, Inria Nancy - Grand Est.<br>In the CAMUS team.                                                                                                                                                                             |
| September 2016 –<br>September 2019 | <b>PhD candidate under contract</b> , Université Côte d'Azur, Inria Sophia Antipolis - Méditerranée. Supervised by Yves Bertot and Cyril Cohen in the MARELLE team.                                                                              |
| September 2012 –<br>August 2016    | Civil servant student, ENS de Lyon.                                                                                                                                                                                                              |
|                                    | Education                                                                                                                                                                                                                                        |
| September 2016 –<br>September 2019 | <b>PhD in computer science</b> , <i>Université Côte d'Azur</i> , <i>Inria Sophia Antipolis - Méditerranée</i> . Formalisation Tools for Classical Analysis – A Case Study in Control Theory.                                                     |
| September 2015 –<br>June 2016      | Master 2 recherche informatique fondamentale, ENS de Lyon, with highest honours. Master's degree in theoretical computer science.                                                                                                                |
| November 2015                      | <b>Diplôme de l'ENS</b> , ENS de Lyon.  Diploma apart from the standard Bachelor-Master-Doctorate system, awarded by the ENS to students whose education comprises interdisciplinarity, assumption of responsability and international mobility. |
| July 2015                          | Agrégation de mathématiques.<br>Civil service competitive exam in mathematics; ranked 98 <sup>th</sup> .                                                                                                                                         |
| September 2014 –<br>June 2015      | Master 2 pro enseignement spécialité mathématiques, ENS de Lyon.<br>Master's degree in mathematics; it was mainly a training year for the agrégation.                                                                                            |
| September 2013 –<br>August 2014    | M1 informatique fondamentale, ENS de Lyon.<br>First year of master in theoretical computer science.                                                                                                                                              |
| September 2012 –<br>July 2013      | Licence informatique fondamentale, ENS de Lyon, with high honours. Bachelor's degree in theoretical computer science.                                                                                                                            |
| September 2010 –<br>July 2012      | Classes préparatoires aux grandes écoles, $Lyc\acute{e}e$ $Henri$ $Poincar\acute{e}$ , $Nancy$ . Two years of training to the entrance exams of some schools, among which the ENS, with majors in mathematics and physics $(MPSI-MP^*)$ .        |
| June 2010                          | Baccalauréat S option mathématiques, Lycée Henri Poincaré, Nancy, with highest honours.  Diploma at the end of high school, scientific stream with speciality in mathematics.                                                                    |
|                                    | The late                                                                                                                                                                                                                                         |

|             | Teaching                                                                                                                                            |
|-------------|-----------------------------------------------------------------------------------------------------------------------------------------------------|
| 2018 - 2019 | <b>Teaching assistant</b> , $IUT R\&T$ , Sophia Antipolis.                                                                                          |
|             | C programming language, Fourier analysis, approximation of functions and asymptotic developments. Supervisor of the Fourier analysis teaching unit. |
| 2017 - 2018 | <b>Teaching assistant</b> , $IUT R\&T$ , Sophia Antipolis.                                                                                          |
|             | C programming language and Fourier analysis. Supervisor of the Fourier analysis teaching unit.                                                      |
| 2016 - 2017 | Teaching assistant, IUT R&T, Sophia Antipolis.                                                                                                      |
|             | C programming language, integral, differential calculus and Fourier analysis.                                                                       |

2012 – 2013 Tutor for ninth grade pupils, Collège Joliot-Curie, Bron.

For the association Trait d'Union of the ENS de Lyon.

Refresher courses in methodology with a view to the brevet des collèges (equivalent to the GCSEs) and to the entrance to high school.

Talks

September 2018 Seminar of the Inria project-team Gallium, Paris.

Asymptotic Reasoning in Coq.

June 2018 Journées FastRelax, Sophia Antipolis.

Formal Proofs for Control Theory and Robotics: A Case Study.

January 2018 International conference CPP, Los Angeles.

A Stability Proof for the Inverted Pendulum.

September 2017 International conference ITP, Brasilia.

A formal proof in Coq of LaSalle's invariance principle.

May 2017 Journées FastRelax, Paris.

A formal proof in Coq of LaSalle's invariance principle.

March 2017 Seminar "Computations and Proofs" of the Inria project-team SpecFun,

Palaiseau.

Refinement: a reflection on proofs and computations.

January 2017 National conference JFLA, Gourette.

Refining the ring tactic.

November 2014 **Journées LAC**, Chambéry.

Constraint systems for proof-search modulo a theory.

November 2013 **PSATTT international workshop**, Palaiseau.

Delayed instantiation of existential variables in presence of a theory.

Internships

January 2016 - Research internship, Inria, Sophia Antipolis.

June 2016 Under the supervision of Cyril Cohen.

Automatic refinements in Coq.

June 2014 – August Research internship, Chalmers University of Technology, Gothenburg, Sweden.

2014 Under the supervision of Thierry Coquand.

Dependently typed lambda calculus with a lifting operator.

June 2013 – Research internship, Laboratoire d'Informatique de l'École polytechnique (LIX labora-

July 2013 tory), Palaiseau.

Under the supervision of Stéphane Graham-Lengrand and Assia Mahboubi.

Congruence closure and proof-search modulo a theory.

Foreign languages

English Certified at level B2. CLES2

German Certified at level B1. Deutsches Sprachdiplom der Kulturministerkonferenz

Miscellaneous

Involvement in Vice-President of the chess club of Antibes from February 2018 to September 2019,

associations Qualified teacher for the French chess federation,

Federal arbiter at the club level.

Programming OCaml, Haskell, C, C++, Python.

Driving license Permis B (license for cars).

First aid Attestation de formation aux premiers secours (first aid certificate).

Interests Reading, music, strategy games.
